

## **METHOD OF TREATMENT USING HUMANIZED ANTI-CD11a ANTIBODIES**

### **Abstract of the Disclosure**

Humanized anti-CD11a antibodies and various uses therefor are disclosed. The  
5 humanized anti-CD11a antibody may bind specifically to human CD11a I-domain, have an  
IC<sub>50</sub>(nM) value of no more than about 1nM for preventing adhesion of Jurkat cells to normal  
human epidermal keratinocytes expressing ICAM-1, and/or an IC<sub>50</sub> (nM) value of no more  
than about 1nM in the mixed lymphocyte response assay.
